

BASA MEMBERS HANDBOOK

2023

THE GUIDE TO THE BRITISH ADHESIVES & SEALANTS INDUSTRY

Building a SUSTAINABLE future together

Our **products** are **formulated with innovative, recycled and ultra-light raw materials**, **have very low emission** levels of volatile organic compounds and are designed to reduce energy consumption. By offering the best and most innovative solutions to design and build sustainably, we contribute to **longer-lasting and higher quality building work**.

THE MAX KOCHMANN AWARD WINNERS

This accolade, in memory of one of BASA's founders and former Life President Max Kochmann, is awarded for services to the association by a company or individual.

Year awarded	Name	Company
2005	Tony Bingham	National Starch & Chemical
2006	Roger Lester	BASF plc
2007	Bob Mabbutt	Bostik Ltd (Laybond Adhesives)
2008	Norman Purcell	Sealock Ltd
2009	Lorna Williams	Eastman UK (Synthomer)
2010	Paul Armitt	Itac Ltd
2011	Trevor Clarke	Pafra Adhesives Ltd
2012	Will Barclay	Geocel Ltd
2013	Line Willis	Henkel UK
2014	Desmond Waight	DanGoods Training & Consultancy Ltd
2015	John & Lynda Murdoch	JMA
2016	Neil Sanders	F. Ball and Co. Ltd
2017	James Igoe	F. Ball and Co. Ltd
2018	Jim Palmer	J P Consultancy Ltd
2019	Mark Louch	Mapei UK Ltd
2020*	James Follows	Apollo Chemicals Ltd
2023	Caroline Raine	Caroline Raine Consultant

** awarded at the 2022 AGM after a 2-year in-person meeting break due to Covid restrictions*

Welcome

Welcome to the 2023 edition of the BASA Member's Handbook, where we aim to provide members and other parties with information about the adhesives and sealants industry in the UK and Ireland. We had a pause on this publication in 2021 and 2022 and chose to publish a smaller BASA Digest, but we hope that moving forward we can make this Handbook bigger and better.

With over 90 member companies, BASA is the business association for the adhesive and sealants industry in the UK and Ireland.

You will find information about each member company and an overview of the work of the association. A comprehensive 'where to buy' Directory for adhesives, sealants, raw materials and ancillary products, the industry's Trade Names, Technical Standards, plus useful guidance documents and further valuable information, can be found on our website at www.basa.uk.com

Together, this handbook and website offers specifiers, users and members of the association virtually everything they need to know about the industry and its products.

BASA is an unincorporated Trade Association formed in 1983 from the marriage of two long established associations, the British Adhesives

Who are BASA

Manufacturers Association and the Sealant Manufacturers Conference.

Set up to act as the voice for the industry, BASA supports its members by representing and promoting the industry, offering guidance on technical and compliance issues, organising networking opportunities for members, and providing members with support services.

The Association is managed and run on a day-to-day basis by a Secretariat, who work under contract by a voluntary Council of senior industry representatives appointed from current member Companies under the rules of the BASA Constitution.

BASA is an independent National trade body dedicated solely to the interests of the adhesives and sealants industry and we liaise with Government regarding legislation to keep members abreast of UK, EU and International proposals and initiatives.

In addition to promoting the interest of industry, BASA's aim is to raise technical standards to assist members and customers in the selection of products appropriate for specific applications. To this end BASA works very closely with the British Standards Institute (BSI) to set and monitor high standards.

Undeniably BASA's main strength lies in its technical working parties which

evaluate product performance, set industry guidelines, and formulate codes of practice. Information gathered by working groups often provides useful materials for leaflets or papers given to conference.

BASA supports the vision of FEICA, the Association of the European Adhesive & Sealant Industry, that the adhesive and sealant industry is committed to enabling a growing population to live a better life and to use the planet's resources responsibly and efficiently.

In light of the transition to a circular economy, BASA supports efforts to improve product efficiency and circularity to help create a more sustainable society, promoting the concepts of energy saving, material efficiency, repairability, durability and recycling.

We will encourage members to continue developing solutions for energy efficiency, to enable the efficient use of raw materials and to continue to safeguard the environment and people's health.

BASA/FEICA Events in 2023

See Events page on BASA website www.basa.uk.com for details and how to book.

May 10th – 11th
ChemUK 2023, NEC, Birmingham

June 8th
BASA Sports Day, Hawkstone Park and West Midlands Shooting Ground

June 27th-29th
InstallerSHOW 2023, NEC, Birmingham

September 13th – 15th
FEICA Conference, Tarragona, Spain

November 2nd
BASA Open Industry Forum - *venue to be confirmed*

November/December
BASA Christmas Dinner Night - *date/venue to be confirmed*

Past Chairmen

Since the creation of BASA, there have been 19 Chairmen:

1983-1984	George Hutson National Adhesives & Resins
1985-1986	Max Kochmann Pafra Ltd
1987-1988	Colin Hall Ralli Bondite
1989-1990	Harry Werrell Swift Adhesives
1991-1992	Paul Jones Industrial Adhesives
1993-1994	Neil MacDonald Evode Ltd
1995-1996	Mike Ozier National Starch & Chemical Ltd
1997-1998	Malcolm Smith H. B. Fuller (UK) Ltd
1999-2000	Gerald Digby Bostik Findley Ltd
2001-2002	Paul Armitt Itac Ltd
2003-2004	Paul Dancer Nordson UV Ltd
2004-2006	Will Barclay Geocel Ltd
2006-2007	Guy Davis National Adhesives
2007-2010	Charles Hodgson Hodgson Sealants Ltd
2010-2012	James Igoe F. Ball and Co. Ltd
2012-2015	Guy Davis Beardow Adams
2015-2018	Mark Louch Mapei (UK) Ltd
2018-2020	Scott Challoner, Wacker Chemicals Ltd
2020-2023	Phillip Lee Ace Adhesives Ltd

Member Benefits

Trade Association Directory

Free listing in the BASA Handbook, distributed at ChemUK exhibition and promoted on our socials. As well as an online directory on the BASA website. We also encourage members to send in their company news stories to publish in the BASA Bulletin and on our platforms.

Events and Networking

We run events for members throughout the year including; the AGM & Industry Lunch in March, Sports Day in June & Christmas Party in December. We also hold free Technical Forums online.

Member Offers

Offers from OAMPS Hazardous Industries, 4Ward Testing Services, Hamer & Hamer Currency Exchange Services & Wallace Hind Recruitment. Discount on ReachReady Gold Membership & FEICA conferences, free attendance at selected FEICA seminars and substantial discounts on a number of key market reports.

Affinity Partners

Our affiliation offers members access to the Construction Products Association guidance notes and research and the FEICA extranet. We also work closely with BSI, ACA, BCF, ASA, TWI, SAA & TTA on a number of topics.

HR, Legal, Health & Safety, Tax & Vat

Access to five business advice lines and over 750 free downloadable business documents from our partner Quest included in your membership fee. Plus a free, no obligation, One 2 One review with a Quest Business Manager for every member.

Online Support

Every Friday at 10am we run a free 30-minute virtual drop-in session to present important regulatory, and business information and general guidance. BASA members have an opportunity to ask any questions.

Join BASA

Membership is available for:

Adhesives and Sealants Manufacturing & Supplier Membership

Companies actively engaged in the formulation and manufacture or distribution of adhesives and/or sealants for sale in the UK and Ireland.

Raw Material Manufacturing & Supplier Membership

Companies supplying raw materials to the British adhesives and/or sealants industry.

Associate Membership

Associate membership is available for members whose business is not directly related to the supply of raw materials or adhesives and sealants.

Consultancy Membership

Consultants can apply for membership if their business is relevant for the sector.

Find out more at www.basa.uk.com

Technical Overview

Jim Palmer,
BASA Technical Officer

The anticipated regulatory challenges we face this year are still not as transparent as we all would like. The combined confusion created by the delayed UK REACH legislation, the remaking of the UK version of the Construction Products Regulation, following the Building Safety Bill receiving Royal assent, and the Retained EU Legislation Bill, currently progressing through the Houses of Parliament, which seeks to remove a huge number of the European Regulations from our statute books. Plus, the new procedures within the HSE to deal with the GB Classification Labelling and Packaging rules and the updating of the GB Mandatory Classification List, all make our lives difficult. Meantime the EU machine rolls on and we are beginning to see divergence, between our legislation and Europe. BASA will, of course, aim to provide the appropriate guidance and timely advice to assist members in weaving their way through this maze, via a variety of routes.

On the BASA website, we have issued and kept updated many guidance documents to help members navigate the pitfalls whether they are supplying single or multiple markets in GB, UK, EU or worldwide. These guides have been collated on our website into a BASA Issues Map, which is the leaping off point to find the guidance to assist members with their specific issues.

During the pandemic, which is thankfully behind us, we all engaged in new ways of working with virtual on-line meetings becoming the norm as the software platforms developed. One BASA initiative during this time was the instigation of weekly half hour 'clinic' sessions each Friday morning. These sessions will continue throughout 2023 and for the foreseeable future. They are open to all members to join, and the BASA consultants are available to answer any questions (or to undertake to seek the answers) for everyone's benefit. Some sessions are open for any topic, and some are themed,

though there is always an opportunity to raise any relevant issue each week. We also have invited presentations at these meetings from industry and government experts on a variety of matters. All the sessions are recorded and are available for review on the members area of the website, where you will also find the list of upcoming sessions.

Environmental and Sustainability issues are a focus both in the UK and EU and BASA has a dedicated working group covering this very broad subject area. In this working group, and all the other working groups, for that matter, we continue to monitor and contribute to the relevant EU developments in the FEICA groups as well as focusing on the UK changes. Of particular relevance in the UK E&S area are the Extended Producer Responsibility (EPR) proposals, following on from the recently introduced Plastics Packaging Tax, and the initiatives to reduce carbon dependency also known as Net – Zero.

We are very fortunate to have a wealth of experience and expertise within the technical community of BASA working hard to interpret the implications for our industry of the various scenarios as they develop, often in advance of their implementation, and to communicate them both to members and back to our government.

Taking part in the BASA working groups is an excellent way to keep up with the latest developments and I would encourage anyone to think about volunteering. As these meetings are all virtual, the time commitment is a matter of personal choice, and can be minimal, but those who participate more fully find it a great contribution to their own personal development, as well as keeping up to date with and influencing the development of each topic. Please do explore the members area of the BASA website to see what appeals.

Of course, face to face meetings are vitally necessary to develop the working relationships between us and we plan to hold at least one Open Industry Forum meeting each year to enable the working group members to engage in person.

UK REACH

UK REACH has applied since 1st January 2021 and applies in the UK in respect of GB only. NI continues to follow EU REACH. It is closely based on EU REACH and requires substances manufactured, used, or imported in volumes greater than one tonne per annum to be registered.

Many Downstream users in Great Britain are still unaware that they have obligations under the current UK REACH legislation, if they are purchasing ANY chemical raw material (including Polymers) from a non-UK legal entity. If any of the substances or substances in mixtures (including all of the monomers and additives in those exempt polymers) are imported by you in aggregate quantities of greater than 1T per annum you as the UK legal entity importing are obliged to register the substances.

Last year we advised our members to ensure that all qualifying substances should be included in your own DUIN and not to rely on your existing supplier. The DUIN process will defer any registration obligations until the end of the submission deadlines, which under the new draft statutory instrument laid before parliament on 20th April 2023 will be extended to October 27th, 2026, 28 and 2030 (volume dependant).

In response to concerns raised by stakeholders around the cost of acquiring the data required to complete their registrations, the government is working with stakeholders to explore an alternative transitional registration model. BASA is working hard with other members of the Alliance of Chemical Associations to work with DEFRA and government ministers to develop a model that is more appropriate for the UK chemical sector without reducing the principles and objectives of the UK REACH chemical framework.

BASA members have access to all of the latest information via the Issues maps and working group pages on the members only area of the website.

In addition we have the following virtual project task groups;

BASA PU Platform – dealing with the diisocyanate restriction

Poison Centres Task Group – dealing with the European Poison Centres requirements

Polymers Task Force – dealing with Polymers under EU and UKREACH

CPR Task Force – dealing with the construction products legislation in the UK and EU

Product Packaging Task Force – a new TF to look at the future of packaging of adhesives and sealants in the context of EPR and the plastics tax regimes in the UK and EU

Don't see your company represented on one of the listed Working Groups? Why not join and contribute to the technical work of the association.

Achieving Net Zero

The role of hydrogen in achieving Net Zero in the UK

On 9th February 2023 DENEZ issued a press release regarding a new UK certification to boost British hydrogen sector. The UK's first globally recognised certification scheme will help verify the sustainability of low carbon hydrogen, giving consumers the confidence to invest in cleaner energy. The introduction of a reliable method to demonstrate the emissions credentials of hydrogen will play a vital role in decarbonising the UK hydrogen sector, promoting cross-border trade whilst stimulating growth and jobs in green hydrogen. The government intends to introduce the certification scheme by 2025 and industry consultation on the scheme ran from 9th February 2023 to 28th April 2023 and sought views on the initial government 'minded to' positions.

We all know that Government has a leading role to play in the development of the low carbon hydrogen economy, as it needs to provide the necessary market frameworks and funding support to deliver commercialisation of new technologies which will support meeting the UK's net zero commitments.

In the UK Hydrogen Strategy, government set out its best current understanding of the range of hydrogen production and use in 2050. Analysis published in the UK Hydrogen Strategy indicated that low carbon hydrogen may increase from minimal use currently to comprising 20–35 per cent of the UK's final energy consumption in 2050 - equivalent to 250–460 TWh and similar in scale to present electricity use.

Low carbon hydrogen is just one among the many decarbonisation technologies that government expects to contribute to meeting net zero and at this stage they have chosen to support the development of both green and blue hydrogen. The initial adoption of blue hydrogen seems to be cheaper than green hydrogen, and ready to use in certain niche industrial settings sooner, however, it has been argued that green hydrogen will become cheaper than blue hydrogen over time.

It seems that UK Hydrogen Strategy and subsequent publications is looking at support for multiple production routes while building the hydrogen economy, including both water electrolysis (green hydrogen) and methane reformation with carbon capture, utilisation and storage (CCUS) (blue hydrogen). It is believed that electrolytic hydrogen costs are expected to decrease considerably over time, with green hydrogen produced using curtailed electricity potentially becoming competitive with blue as early as 2025.

In April 2023 the government updated the hydrogen Net Zero Investor Roadmap to showcase the UK hydrogen offer and the scale of ambition for the role of the hydrogen economy in meeting Net Zero. It spotlights the exciting investment opportunities across the hydrogen value chain – from production, through transmission and storage to the range of potential end uses, including power, transport and heating.

It includes details of key elements of the UK policy framework which together represent the next substantial step forward in developing a thriving UK hydrogen economy.

The roadmap also reflects the significant increase in the UK's hydrogen ambition. We have doubled our ambition to up to 10GW of low carbon hydrogen production capacity by 2030, with the intention that at least half of this will be from electrolytic hydrogen. Increasing our production ambition could mobilise over £11 billion of private investment and support over 12,000 jobs by 2030, ensuring that we have reliable, secure energy while maintaining progress towards our legally binding targets under the Climate Change Act.

The update to the UK's Green Finance Strategy sets out how government will align our world-leading financial centre to a net zero, nature positive and climate resilient world, and how government will mobilise public and private financial flows to meet our climate and environmental targets.

Journey to Net Zero

An important lesson on your journey to net zero is that the easiest, most-obvious ways to reduce a company's carbon footprint will not lead all the way to net zero. Too much focus on these low-hanging fruit might distract from more fundamental measures. To get to a net-zero world, companies need to engineer emissions out of their entire business system, including their supply chain and customers' use of their products.

To achieve net zero, all your activities, supply chain, products and services should result in no net impact in terms of greenhouse gas emissions and for many BASA members, this will require a serious effort to remove carbon from processes, as well as carefully chosen and certifiable carbon offsetting schemes that balance out any residual emissions.

Business benefits

There can be a compelling business case for focusing on net zero, because your investors, funding bodies, customers and staff may already be asking about your net zero goals and actions. There's a real risk of losing business because of market changes driven by global net zero efforts.

Reducing emissions can also boost your profits. McKinsey has found that supplying goods and services to enable the global net zero transition could generate £1 trillion for UK businesses by 2030.

There are some obstacles, though and it's important to recognise the need for serious financial investment in more large-scale opportunities, like:

- Renewable energy
- Heat decarbonisation
- Product eco design

Even thinking about where to start and finding the right solutions can be difficult. Some low carbon solutions, particularly around heat and transport, are only now becoming commercially available. They also don't bring the return on investment required by your investors.

Basic First Steps

These steps can bring about costs reductions and so can even save you money. Better energy efficiency (LED lights and 'switch off' management) and reduced business travel (especially since businesses have already adapted to video conferencing) will all help lower carbon emissions and reduce costs at the same time.

For many businesses. The most significant emissions – and the potential for climate action – lie in 'scope 3 assets'. These are not owned or controlled by the reporting organisation, but contribute indirectly to the company's value chain. To truly reduce emissions successfully, companies have to take action on these scope 3 emissions, and this can be really difficult even to get the data to bench mark your current position. BASA wants to do more in the coming years to help members to look at these aspects, and we are aware that DESNZ are going to try to get some more guidance out to SMEs to help them with reporting and data access.

-
- Use electricity from renewable sources
 - Drive less or switch to electric vehicles
 - Cut down on packaging
 - Make your supply chain greener

By using suppliers that are also lowering their own carbon emissions, and by buying products that take less energy to make, transport and use, you can reduce your business's supply chain emissions.

Leading the way in speciality polymers and tackifier resins

Synthomer offers a wide range of polymer chemistries including acrylic, styrene acrylic, vinyl acetate co-polymer, styrene butadiene latex and acrylonitrile butadiene latex. Synthomer also provides the pressure sensitive industry with the broadest range of tackifier resin chemistries.

With our PLEXTOL, REVACRYL, EMULTEX, LITEX, SUNCRYL and SYNTEBOND range and our FORAL, KRISTALEX, ENDEX, PICCOTAC, REGALREZ and TACOLYN tackifiers, we cover the most varied applications in the Adhesives and Sealant industry.

2K Polymer Systems Ltd

Address: Venture Crescent, Alfreton,
Derbyshire, DE55 7RA
Telephone: 01773 540440

2K Polymer Systems Ltd (part of Marmon Group) a Berkshire Hathaway company, is a leading UK manufacturer of two component products for bonding, sealing filling, maintenance, repair and anchoring applications. We specialise in private label 2 component adhesive solutions for the industrial, construction and consumer markets. Our modern manufacturing, filling and packaging facility based in Derbyshire

supplies high quality products to our global customers via our international sales offices and warehousing operations in the UK and USA. A unique combination of polymer formulation experience combined with innovative packaging solutions enables 2K Polymer Systems to present a robust product range delivering world class performance, with unrivalled usability and reliability – all personalised in your own brand. We offer 2 component structural adhesives, 2 component epoxy putty sticks, 2 component chemical anchoring products, epoxy, Polyester grouts, mortars and co-

formulation development /support. Two component products are already widely used within the industrial and construction markets globally, however when using our "2K 1K" range of easy to use and sustainable packaging solutions, the use of complex mixing and expensive packaging options no longer apply.

www.2kps.net

Ace Adhesives Limited

Address: Shenstone Drive, Northgate,
Aldridge, Walsall, West Midlands, WS9 8T
Telephone: 01922 459393

With three UK sites – and customers from Cornwall to Inverness – Ace Adhesives is a well established and well respected industrial glue supplier to UK industry. Ace became part of the Gluecom Group in 2005. With sites in Belgium, France, Poland and the UK Gluecom manufactures PVA dispersions, Hotmelt Adhesives,

Starch Adhesives and Jelly Glues. Ace Adhesives specialises in industrial adhesives for all paper, board and timber applications including: books, brochures & magazines; cardboard cores & tissue paper; corrugated cases; paper bags; folding cartons & trays; litho laminated cartons & cases; lever arch files & ring binders; presentation boxes; worktops; panels, doors; beds & sofas. Our aim is to build upon the excellent reputation we have as a adhesive manufacturer and supplier, without ever losing sight of

what has made us so successful, which is our commitment to provide our clients with quality industrial adhesive products, excellent service and support. For further information please feel free to contact us and an experienced member of staff will be happy to help you.

www.aceadhesives.co.uk

AdCo (UK) Ltd

Address: 43-45 Passfield Business Centre,
Lynchborough Road, Passfield, Liphook,
Hampshire, GU30 7SB
Telephone: 01428 751755

AdCo (UK) Limited is a specialist adhesive company supplying a range of highly technical based adhesives, allied products and application equipment to a wide variety of markets including: · Packaging · Furniture & Joinery · Printing & Bookbinding · Education · Arts & Crafts · Building & Construction · Product Assembly · Electronics. AdCo has its own range of products and also offer the full

range of speciality adhesives and sealants from international manufacturers, all of which have a comprehensive range that compliment each other. AdCo are official UK distributors for the full range of adhesives from AkzoNobel of Sweden, for veneering, laminating and structural timber bonding. With these product ranges behind us AdCo are able to offer a range of adhesives and allied products that are the envy of many adhesive companies. With our knowledge of adhesives and application techniques we offer a 'find & supply' service to all, thus ensuring that any

bonding problem can be solved. In 2017 AdCo acquired the manufacturing, sales and distribution rights to the full range of speciality binding and printing adhesives, including Rioflex fan-a-part padding adhesive for NCR papers, previously manufactured by Howarine Calvert Ltd. AdCo – The Professional's Choice

www.adco.co.uk

Adshead Ratcliffe & Co Ltd

Address: Derby Road, Belper,
Derbyshire, DE56 1WJ
Telephone: 01773 826661

Adshead Ratcliffe & Co Ltd (ARBO Sealants) is a major UK manufacturer whose ARBO brand sealants and adhesives are widely specified in the construction, glazing, engineering, automotive, fire protection industries and many others. With our own manufacturing, laboratories and technical services department, we are able to offer a full architectural sealant specification and technical back-up which includes our

unique Arbomaster Warranty Scheme. If you require own label product manufacturing to your own formulation or to develop a product for your end application, we are here to help. Our Arbo Facades Solutions Division is able to offer facade system designers and installers a range of EPDM Membrane, VOC free adhesives and other ancillary items to meet the challenging requirements of current building regulations. ARBO® – part of CARLISLE® CM Europe. In 2017, Adshead Ratcliffe & Co Ltd became part of CARLISLE® CM Europe following the acquisition by the US Group CARLISLE® Companies

Incorporated. The CARLISLE® CM Europe group is Europe's leading waterproofing and sealing solutions provider for roofs, facades and buildings. The umbrella brand CARLISLE® CM Europe unites the trusted brands. Please consult our website at www.arbo.co.uk for a wider understanding of our services.

Advanced Adhesives Ltd

Address: Architectural House, Plummer
Street, Newcastle, Tyne & Wear, NE4 7AB
Telephone: 01912 722982

Advanced Adhesives was founded in 1996. From a humble start up, it has grown into a thriving company which has grown 20% year on year for the last 8 years. This has allowed the business to make the necessary investments in buildings, staff and equipment to "right size" the business for the business which it will become over the next five years and beyond. We are a medium size company with very large aspirations. We have expert adhesives, advice and testing facilities to rival the big

boys. Our size allows a higher degree of flexibility, offering you shorter lead times, better communication, and an ability to rapidly develop solid solutions, no matter the order quantity. We have achieved this rapid growth by significant reinvestment in automation, which has helped us to reduce costs for end users. The in house testing facilities ensure stronger and safer products, and we recently moved to a 1000Sqm facility to keep up with increasing demand, building a brand new production facility in the process. Supplying industry sectors of: Automotive, Marine, Electronics, Aerospace, Commercial Signage, White goods manufacturing, Construction, Power

generation, Military and Engineering. Our products range includes Anaerobic, Cyanoacrylate, Hybrid MMA Structural Adhesives, Epoxies, Silicone and Polyurethane technology, U.V. Light Curing Adhesives, Hot Melts, Solvents & Water Borne, and High Performance Tapes. We are a British owned and operated adhesive company and export worldwide. We hope to build partnerships with our customers and bonds beyond business.

Alpha Adhesives & Sealants Ltd

Address: Llewellyn Close, Sandy Lane Industrial Estate, Stourport-on-Severn, Worcestershire, DY13 9RH

Telephone: 01299 828626

Alpha Adhesives & Sealants Limited was established in 1987, with the aim of providing quality adhesives, sealants and coatings. During the ensuing years Alpha developed its business across a wide customer base to include Automotive, Marine, Construction, Aerospace, Civil Engineering, Military and general industry. The quality of Alpha products together with the 'Can Do' approach by the highly experienced management and technical team have been key factors

in the company's success in establishing successful partnerships with customers all over the world. Alpha acquired the Dunlop Industrial Adhesives Division in March 2004; origins of which date back to the early 1950's and include brand names such as 'Thixofix'. This manufacturing site was re-located to Worcestershire and full manufacturing to original formulations was taken over by Alpha. The head office, manufacturing plant, warehouse and R & D laboratory are based centrally in a modern facility on the outskirts of Stourport-on-Severn, Worcestershire. BSI ISO 9001:2015 Accredited Alpha takes pride in carrying out collaborative research and development to meet

specific customer requirements. Alpha products are backed up by experienced in house technical service department. It is through these services together with an extensive product range, that Alpha is able to meet the ever changing needs of its diverse customer base. All ALPHA products are associated with the finest in Adhesive Sealant and coatings technology. If you have an application, we have the technology!

Apollo Chemicals Ltd

Address: Sandy Way, Amington Industrial Estate, Tamworth, Staffordshire, B77 4DS

Telephone: 01827 54281

Apollo is a liquid adhesive, sealant, coating & primer manufacturer. We supply high-performance products worldwide across a range of industrial, construction, roofing and end-user markets. Supply is direct and via distributors, under Apollo and private-label brands. Established in 1972 in Tamworth, Apollo's vision is to become the unseen coating, adhesive and primer department of our customers' businesses. Our vision is in sync with building long-term partnerships by adding value

and building trust. At Apollo, we have great people who are passionate about solving customer problems. We strive to add value across our entire supply chain, which is communicated via our brand promise 'More than adhesives'. In January 2022, Apollo became part of the global and well-respected adhesive manufacturer, H.B. Fuller. Since 1887, H.B. Fuller has been a leading global adhesives provider focusing on perfecting adhesives, sealants and other specialty chemical products to improve products and lives. Moving forward, the change of ownership opens up access to further resource, technology and expertise to further enhance product

More than adhesives

offering and service to customers. We are excited about utilising such assets and collaborating with our customers to help them to develop and grow in their markets. Being part of a global company also gives our customers further reassurance regarding continuity of supply. We now excitedly look to the future together.

ARDEX UK Limited

Address: Homefield Road, Haverhill, Suffolk, CB9 8QP

Telephone: 01440 714939

For more than 60 years, ARDEX has been a quality leader for the flooring and tiling industries, the brand of choice for installers and distributors. ARDEX today is still an independent family-owned business. This means that in our permanent efforts to achieve market-shaping innovations, we have been able to retain our most important tradition: uncompromising quality. This is something we guarantee by applying the latest rigidly enforced quality assurance

procedures, making it no coincidence that ARDEX is regarded as a premium partner of the construction industry. Strong internal growth and intelligent acquisitions in foreign markets have put the ARDEX Group on the map with 53 subsidiaries and 3,000 employees on all continents. With its 14 major brands, the ARDEX Group generated a worldwide annual turnover in excess of 770 million euros in 2018. This marks an important milestone for ARDEX in becoming one of the world's leading suppliers of high-quality specialist building materials. As a longstanding partner to the trade, we know the practical requirements

first hand. Our vast experience of materials and working methods, coupled with constant dialogue with our customers in the skilled trades, are our most important source of inspiration. We draw on this to develop product systems that command respect in the marketplace by meeting professionals' needs. Our systems are optimally matched and extremely cost-effective thanks to their ease of use and high coverage.

FSi Limited

Address: Westminster Industrial Estate,
Tamworth Road, Measham, Leicestershire,
DE12 7DS

Telephone: 01530 515130

FSi are the largest manufacturer of passive fire protection products in the UK and we are proud to be part of the Etex group – the UK's leading source of drywall, steel framing and fire protection solutions. FSi manufactures and develop a complete range of market leading compartmentation systems (Fire Rated intumescent acrylic sealant, Fire Rated silicone, Graphite sealant, Ablative coating, FR pipe collars, FR Compound, Batts etc...) suitable for applications all over the world. Alongside this we have a comprehensive range of test data

backing up these innovative products. These systems are primarily used to prevent or slow down the passage of elements, such as fire, air, sound, movement and water. We pride ourselves on the high level of testing and technical expertise that has been built up through years of experience within the industry, from site hand to dealing with large Multi-National conglomerates, this either under our brand or private label. This allows us to supply product both in the UK (BS Regulation) throughout Europe (EN Regulation) and Worldwide (EN and UL Regulation). All of our main products are 3rd party certified. We also offer a complete range of systems which are CE Marked, showing that our quality can be measured. We are here to

help and make sure the correct solution is specified correctly the first time to ensure budgets, timescales and required specifications are kept to. Furthermore, alongside our market leading Fire Rated products, we manufacture as well a range of technical sealant (neutral cure silicone, acrylics etc) for application in the construction industry.

purpose built plant in Winsford, Cheshire, which, in terms of manufacturing and logistics, is one of the most sophisticated of its kind in Europe. In-depth technical resources and the advanced production, planning and distribution techniques employed have resulted in a vast range of high quality, high performance products, and a level of service achieved

in partnership with our customers, which is without a doubt second to none. Quality sales and marketing operations, and some of the most memorable advertising this market sector has ever seen, support each of the company's leading brands. Henkel consumer adhesives supplies over 700 different products for both national and international markets.

General Industry

As the largest adhesives manufacturer in the world Henkel continue to invest heavily in it brands and technologies. Innovation is a key driver of success with our customers, where we constantly set new industry standards both in product development and design, but also customer processes.

Extensive technical support and advanced training programmes ensure the most effective and reliable solutions are found. Access to a huge product portfolio with proven performance ensures industry challenges and specific applications are easily met across a diverse range of

markets. Brands such as Loctite have for years been associated with performance and reliability - the new General Industry division can now extend these parameters across a full value chain encompassing adhesives, sealants and surface treatment technologies.

Packaging & Consumer Goods

As the largest adhesive manufacturer in the world, the Henkel Group continues to invest heavily in research and development activities which provide the quality products required to meet ever-changing market requirements. In addition, these activities are closely linked with the environmental aspects of the product and its end use. Significant investment in state of the art manufacturing facilities ensures

consistent adhesive performance. Henkel manufactures technically advanced products to the highest quality standards and provides the service that industry demands. We pride ourselves on our speed and quality of response to customers' technical needs. With the resources associated with an international company and with strong European market connections, Henkel can meet the various requirements of

the automotive, bookbinding, cigarette, construction, electronics, envelope, labelling, packaging, shoe and building, furniture and woodworking industries, as well as the general industry and non-woven sectors. Henkel aim to be a source for most, if not all of its customers' requirements and this is achieved by having access to diverse adhesive technologies, thus providing the best solutions to our customers.

Hodgson Sealants Ltd

Address: Belprin Road, Beverley, East Yorkshire, HU17 0LN
Telephone: 01482 868321

Hodgson Sealants are the largest independent sealant manufacturer in the UK. We're a family-run business based in Yorkshire and we've been growing for over 50 years. We're proud to be leading the way in sealant manufacturing in the UK, with our own in-house R&D facility. Our products are supplied across the globe. Celebrating our 50th Anniversary in 2018 we demonstrate a track

record of supplying high performance products to building, transportation and consumer markets for over half a century. As a UK based manufacturer we are well placed to provide customers with the option of own label products as well as the Hodgson brand and have the ability to develop solutions tailored to our customers specific needs. Our manufacturing capabilities range from silicone and hybrid sealants/adhesives through to acrylics, butyl based sealants and even putties. We aim to be the first choice for anyone wanting to

buy trusted quality products from a long established UK manufacturer. In 2022 Hodgson Sealants Group Ltd, the parent company of Hodgson Sealants Ltd, acquired independent private label sealant manufacturer Britchem Ltd.

Palace Chemicals Ltd

Address: Speke Hall Industrial Estate,
Speke, Liverpool, Merseyside, L24 1YA
Telephone: 01514 866101

Palace Chemicals Ltd is a privately owned UK based manufacturer of Building Chemicals & Adhesives and DIY products which includes a comprehensive range of tile and stone adhesives, grouts and surface "after-care" products under two distinctive brands, namely PALACE and LANGLOW whilst also offering a fully supported "private label" service for large nationwide distributors preferring to operate under their own brand. Whilst Tiling products remain the core activity for Palace Chemicals, we were originally established in 1978 as a manufacturer of a broad range of building chemicals and damp-proofing products and this expertise remains a central part of the company's product range today. The Palace building products range still includes Water-proofing systems, timber treatments, mortar admixtures, general purpose building adhesives and protective surface coatings. Palace acquired Langlow Products in 1995

which is one of the pioneering DIY brands offering a unique and extensive range of DIY solvents, Decorating sundries, wallpaper adhesives, Fillers, sealants and Paint removers all under the LANGLOW brand and designed to suit the needs of the Decorating professional or DIY enthusiast. Palace Chemicals operates to standards accredited by the BSI for the Quality assurance, Environmental Management & Health & Safety Management and remains committed to developing product formulation and manufacturing technology which ensures the range offered is provided at optimum service levels and remains at the leading edge of all applicable performance and quality standards. The PALACE range includes an extensive portfolio of Tile and Stone adhesives, grouts, sealants and surface After-Care products along with floor levellers and building chemicals. The high reputation our products and services have gained with both the professional and trade users encourages many of our larger customers & distributors to choose Palace as their private label partner.

In the DIY sector we offer the LANGLOW brand range of products which is one of the UK's longest established DIY names and offers an extensive range of DIY solvents, Decorating sundries, Wood treatments, Wallpaper adhesives and Paint removers, all packaged and presented to suit the needs of the DIY & Decorating market. Recently Palace has become the UK licensed manufacturer of the Laticrete range of Adhesives; Grouts & Specialist tiling products, which have a global reputation in some of the world's most prestigious and ambitious construction projects where product performance levels are often well in excess of the more established standards and further enhances the range of advanced Technology manufactured by Palace.

Raw Material Suppliers

Azelis UK Ltd

Address: Axis House, Tudor Road, Manor Park, Runcorn, Cheshire, WA7 1BD
Telephone: 01928 793000

Azelis does much more than move goods. We move markets forward. Breaking new ground in our technical laboratories by combining ingredients with ideas and creating opportunities through innovation. Leveraging seven renowned local and regional brands provides us with a unique go-to market strategy. All of our brands are the best in class distributors in their respective market and offer the highest quality products and technologies supported with application labs and technical service. Azelis UK & Ireland was created through a combination of 4 major acquisitions. Particularly in the UK, in

2002 we acquired Chance & Hunt Ltd which was established in the distribution of industrial and performance chemicals across market sectors including coatings, agrochemicals, water treatment and animal nutrition. In 2008 we then acquired S Black Ltd expanding our business into the Life Sciences sector, including Personal Care, Pharma and Food. In 2011, Azelis acquired S&D UK Group which strengthened our position in food and pharma. In 2022 Azelis UK expanded into the industrial chemicals business with the acquisition of 100% of the shares of WhitChem, a well-regarded distributor focused on CASE (coatings, adhesives, sealants and elastomers) and R&PA (rubber & plastic additives) in the UK. This acquisition reinforces Azelis' position in industrial chemicals,

and specifically in the CASE and R&PA market segments in the UK. In the UK you can rely on teams of market focused, technical trained sales and marketing staff. We have 4 laboratories catering to Personal Care, Homecare & Industrial Cleaning, Food & Nutrition and Pharma & Health, and we work with customers and principals to develop formulations for their applications. Our network of warehouses across the UK is geared to providing first class service to our customers.

BASF plc

Address: P.O. Box 4, Earl Road, Cheadle Hulme, Cheadle, Cheshire, SK8 6QG
Telephone: 01614 885223

BASF are the world's leading chemical company, combining economic success with commitment to environmental protection and social responsibility. Through science and innovation, we enable our customers in nearly every industry to meet the current and future needs of society. Our portfolio ranges from chemicals, plastics, performance products and crop protection products to oil and gas. The range of raw materials offered by BASF for Adhesives & Sealants includes aqueous polymer dispersions and adhesive additives that have been optimized to suit a variety of applications. Our products are used especially in packaging, transportation, furniture and labels. For Pressure Sensitive Adhesives, our Acronal® and

acResin® products make solutions possible in challenging adhesive applications. They are used for highly demanding labels, tapes, films and other special applications. We offer Adhesive Raw Materials for Industrial Adhesives in the following fields of application: packaging adhesives - especially for peel & seal envelope closures and labelling of plastic bottles, lamination adhesives - especially for glossy film overprint lamination and film/film composites, and lamination adhesives for the interior car trim, furniture foil and the shoe industry. In addition we have some special products to improve the adhesion of packaging adhesives on difficult surfaces. Our Construction product range is equally versatile. The main applications for our range of components are Ceramic tile adhesives, Flooring adhesives, Sealants, Flexible roof coating, Water proofing membranes,

Primers, Mortar modification and concrete repair systems for example concrete plasticizers. BASF use BTC to distribute their portfolio of Adhesive Raw Materials in Europe. BTC Europe is BASF's pan-European distribution organization for small and medium-sized customers. BTC offer the full range of BASF products for the Adhesives & Sealants industry and are also able to offer complimentary products, such as Rheovis® Rheology modifiers, Dispex® Dispersants, Tinuvin® light stabilisers, Irganox® anti-oxidants and the versatile Oppanol® and Glissopal® polyisobutenes (PIB).

Smart Materials, part of Cargill Bioindustrial-Performance Technologies, formerly part of Croda, is a global supplier of high performance bio-based building blocks, functional ingredients, and polymer additives. The Smart Materials business provides environmentally friendly and innovative solutions based on carefully selected raw materials. Our ingredients support our customers in

developing safer, lighter, miniaturised, durable, multifunctional and affordable solutions. All this whilst offering a pathway to low carbon solutions. We combine technology platforms to create market driven innovations that help our customers to meet today's needs and be prepared for the future. The combination of innovation for high tech fast changing markets, security of supply and technical applications support is why we like to work in partnership with key stakeholders in our focus markets.

Some key ingredients for the adhesives industry are: Priplast™ bio-based polyester polyols for use in polyurethane adhesives, Priamine™ dimer diamines and Pripol™ dimer diols for polyamide adhesives. Our B-Tough toughening agents can be used in epoxy adhesives, and our polymer additives provide anti-block and anti-dust effects.

TER (UK) Ltd

Address: Milton Hall, Ely Road, Milton,
Cambridge, Cambridgeshire, CB24 6WZ
Telephone: 01223 828640

In July 2012 the TER GROUP further strengthened its growing pan-European network by opening TER (UK) in Cambridge. The launch has proved a great success enabling UK customers to source a wide range of raw materials. The initial focus was on offering raw materials for the Paints & Coatings, Construction, Adhesives, Textiles, Paper and Glass Fibre industries. Today TER

(UK) are servicing a wide range of UK customers with both direct shipments or with materials from strategically located UK warehousing. In a second phase TER (UK) enhanced its raw material portfolio by being appointed the UK Distribution partner for a variety of product lines from both Evonik Industries and Claraint SE. TER (UK) have also implemented the activities of its Group Industry "Food & Feed" which is a core business activity of the TER GROUP. TER (UK)'s aim is to continue the TER philosophy of working

closely with our customers to identify the raw materials they want - and to provide them with a range of products that meets their requirements in terms of quality, price, delivery and back-up.

Troy Biosciences / Arxada

Address: 71 Queen Victoria Street,
London, EC4V 4BE
Telephone: 07408 816133

In January 2022, Arxada, a leading global specialty chemicals business, today announced the completion of the merger with Troy Corporation. Troy and Arxada are now one company, offering new levels of innovation and value. Harnessing the strengths of our legacies, we are developing new platforms of performance and service for our customers. For over 50 years Troy has developed and manufactured preservatives and additives for various industries, enabling our customers

to produce high performing, cost-effective and sustainable products. The combination of Troy's strength in architectural coatings and industrial preservation, leadership in IPBC technology and broad range of performance additives perfectly complements Arxada's strengths in wet state preservation. Arxada is a global science-based specialty chemicals business creating innovative chemistry and solutions. The company aims to solve the world's toughest preservation challenges by enhancing sustainability with cleaner, greener solutions. Arxada focuses on multiple end-markets primarily in: Human Health & Nutrition,

Home & Personal Care, Paints & Coatings and Wood Protection, providing a broad portfolio of differentiated products and solutions, supported by its science and innovation capabilities, in-depth regulatory know-how and track record in manufacturing and process development. The company's 3,600 employees contribute to the success of its customers, spanning 25 production sites and 13 R&D centers.

Williams Consultancy Professionals (WCP) are a family company partnership. WCP are

contracted to provide the BASA Secretarial Services. James Williams offers bespoke engineering designs/moulds/test pieces for the adhesives and sealants industry and Lorna Williams also offers Consultancy services based on her 25 years' experience in the industry and

her previous and current involvement in CEN and ISO sealants and adhesives committees.
